

Soul painting

Individual soul painting

In order to paint a soul picture I previously establish a connection to the soul of the customer. I look at and sense his/her essence that starts showing itself by colors, forms, dynamics, sounds and symbols. All of these impressions result in a story or in a «picture».

When placing an order, the customer can express the desire if the picture shall be painted in abstract or realistic style.

During the painting process the most significant themes are selected and accordingly arranged. I try my best to transform the inner view into pictures, making the non-visible visible. When the painting is handed over, I pass what I perceived during the painting process to the customer, if desired. Soul paintings often disclose past lives, talents, and tendencies of the person. Needless to say but because it is so pleasant it should be mentioned here, that every picture is one of a kind, such as the entity of each human being is.

Subtle paintings

Also non person related pictures are offered. Such painting are for sale in this webpage and can be found in the «offering» category.
